## Assessment of Gulf of Maine / Georges Bank american plaice (*Hippoglossoides platessoides*) Assessment ID:NEFSC-AMPL5YZ-1960-2008-OBRIEN

Assessment ID:NEFSC-AMPL5YZ-1960-2008-OBRIEN Issue URL: http://www.marinebiodiversity.ca/RAMlegacy/ramlegacy-bug-reporting/112

Area ID: USA-NMFS-5YZ

## General assessment details.

| Detail             | Value                                     |
|--------------------|---|
| Management body    | NMFS                                      |
| Assessment group   | Northeast Fisheries Science Center        |
| Assessment authors | Northeast Fisheries Science Center        |
| Assessment method  | A general approach to fitting VPA models. |
|                    | ADAPT is based on minimising the sum-     |
|                    | of-squares over any number of indices of  |
|                    | abundance to find best-fit parameters.    |
| Publication year   | 2008                                      |
| Timeseries span    | 1960-2008                                 |
| Document           | .pdf (pdf not in database)                |
| Recorder           | OBRIEN                                    |
| Date entered       | 2008-12-12                                |
| Date last loaded   | 2011-06-14                                |
| QA/QC complete     | YES                                       |
| Date approved      | 2011-06-10                                |

Biometrics provided. Note that the assumed timeseries to which the reference point pertains is indicated in parentheses.
